May 31, 2007 – FOR IMMEDIATE RELEASE

New “X” Series of Invisible Speakers and EASE Data released by Stealth Acoustics.

Stealth Acoustics raises the bar in providing professional quality, totally invisible speaker solutions.

Mount Vernon, WA – Stealth Acoustics announces the release of their newly designed “X” series of full-range invisible flat-front speakers for wall or ceiling installations. Beginning with the new AX3, which directly replaces the retiring model A3, Stealth’s “X” series technologies will soon be propagated across the entire line of Stealth full-range speakers.

Providing high-quality audio, Stealth speakers have garnered a reputation for being “best in class” of any invisible speaker solution. The AX3 model continues to enhance performance by reducing the air-chamber of the acoustic lever within the speaker and re-voicing of the system. The result is an even more natural sound and warmth compared to the award-winning previous versions. The AX3 is available for immediate shipping to Stealth’s network of direct dealers and value added resellers. Manufacturers suggested MAP is \$1500.00 per pair.

Along with the release of the “X” series of speakers, Stealth also makes available complete EASE and CLF (Common Loudspeaker Format) polar response and speaker performance data for the AX3. “With the X series, we now have a speaker solution that we are very comfortable will satisfy the needs of the commercial AV market, including board rooms, speech privacy systems and council chambers, eliminating the clutter of speaker boxes and grills while maintaining professional quality audio output” Said Steve Olszewski, vice president of sales for Stealth Acoustics. “Having these test results provided by Pat Brown of Syn-Aud-Con / ETC adds great validity with acoustical engineers, audio consultants and designers who rely on prediction software to ensure proper speaker performance”.

Stealth Acoustics will be showcasing the AX3 in the “Immersive Audio Pavilion”, Booth #17045, Hall “E” at Infocomm in Anaheim, June 19-21.
