RETRACTABLE ART COVER

Stealth CoverArt systems are an aesthetically pleasing way to integrate a TV display into a home's decor by turning it into a beautiful piece of framed art. When activated, the canvas artwork retracts to reveal the TV concealed underneath.

CoverArt systems are ideal for commercial settings as well. Use CoverArt to hide restaurant TVs for fine dining but reveal them for game day events or cover meeting room displays when not in use.

CoverArt can also conceal safes, electronics, and other sensitive spaces.

AESTHETICALLY CONCEAL

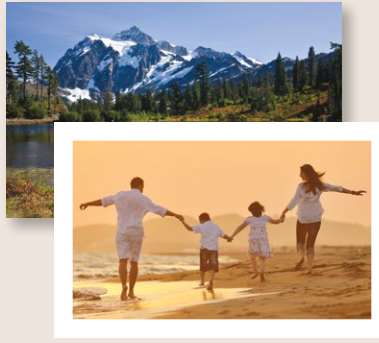

- Residential TV Displays
- Commercial TV Displays
- Meeting Room Displays
- Museum Displays
- Audio/Video/Computer Equipment
- Security System Control Panels
- Safes for Valuables and Weapons
- Liquor Cabinets
- Sensitive Storage Areas

Frame

Choose from multiple frame styles* to match any decor.

**Contact Stealth for a current list of available options.*

Artwork

Select from Stealth's online gallery, or supply artwork/photography* for high-quality printing on a simulated canvas material with a matte clear-coat finish.

**Image minimum 12-20 megapixels depending on model*

Design

Choose an edge-to-edge layout or faux-mat border.

When open, a small part of the artwork canvas is visible above the TV, and a mat border may minimize the effect.

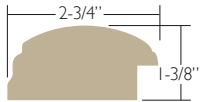

COMPLETE CUSTOMIZATION

CoverArt systems are available in four size ranges to fit televisions up to 75" (190cm) diagonal. Once artwork and options are selected, each system is custom designed and manufactured.

BURL

Satin Black: #3381

Black Slope: #W250

Ebony: #E310

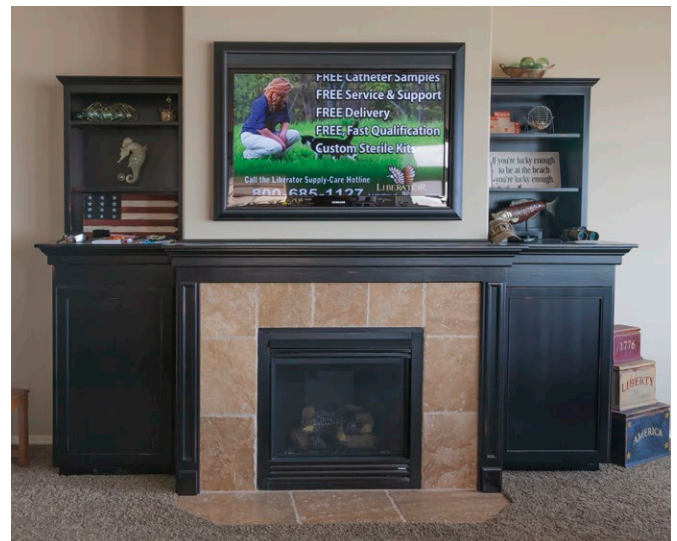

SIMPLE INSTALLATION

CoverArt systems ship completely assembled, ready to hang and operate.

- CoverArt frames install with a 1" (25mm) clearance around all sides of the TV for easy accessibility.
- Use an articulating TV mount for easier CoverArt installation and easier access to the TV for setup.
- For a cleaner finish, paint the area behind the TV/CoverArt in black or a dark color.

Each project is unique. Use hardware appropriate for the installation site to mount the CoverArt.

- *For on-wall installation:* Two simple wooden cleats may be fashioned on-site and attached with proper spacing to the wall on either side of the TV.
- *For recessed installation:* The side skirts of the CoverArt will fit in and attach to the inside of the recessed area, creating a low-profile look.
- After the CoverArt is attached to the wall, power and optional control wiring are connected.
- CoverArt includes IR remote control with optional contact closure support for home automation systems.
- *Detailed installation and operation instructions come with each CoverArt.*
