THE **STEALTH PATIO THEATER** FAMILY

STEALTH PATIO THEATER OUTDOOR LED TV SYSTEMS

EXTRAORDINARY OUTDOOR TV SYSTEMS

The first Stealth Patio Theater (SPT) debuted in 2015 with the core concept of creating a self-contained outdoor TV system that did not interfere with the aesthetics of outdoor spaces. It leveraged the latest in LED technology to overcome the problems homeowners and integrators face when replicating a theater-like experience outdoors with traditional weatherized TVs and delicate projector systems. STP systems have superior daylight viewability (brightness), screen size, weather resistance, and longevity than alternative solutions adapted from indoor systems.

Today, three distinct models of Stealth Patio Theater offer unique outdoor TV solutions with stunning performance - even in direct sunlight. These complete TV systems eliminate the guesswork of designing and sourcing a custom LED display system.

THREE DISTINCT MODELS

- The SPT *Extreme* features a vertical lift system ideal for recessing the all-metal cabinet below grade for a pop-up experience. Available in four sizes with 3.1 audio built directly into the cabinet or as a sound bar that travels up with the display.
- Designed for luxury marine applications, the fold-out SPT *Transformer* is a compact solution for any location. The fiberglass cabinet features built-in, weatherproof 3.1 audio.
- The modular SPT *Megalith* is available in 7 sizes with P3 or P4 pixel pitch. The *Megalith* can be wall mounted or installed as a free-standing display with an optional 3.1 sound bar.

BUILD QUALITY

Each *Extreme* cabinet is designed and skillfully crafted in Stealth's facility using laser-cut aluminum and stainless steel materials, then finished with high-performance coatings.

The *Transformer* features a marine-grade fiberglass exterior shell built locally to Stealth's specifications by a renowned Pacific Northwest yacht manufacturer. A powder-coated steel internal frame supports Stealth's proprietary screen folding mechanism.

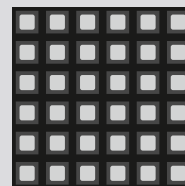

The *Megalith* mounting system, support structure, and control system are manufactured and installed in-house.

Once the internal high and low-voltage electrical systems are complete, every SPT system receives extensive testing before shipment.

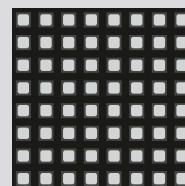

PIXEL PITCH

Pixel pitch is the measurement used to denote the resolution of an LED screen. The pixel pitch value (P) is the distance (in millimeters) between the centers of the individual RGB pixels; a P3 screen has 3mm spacing, while a P4 screen has 4mm spacing. Smaller pixel pitch values mean a higher resolution screen that allows for closer viewing distances and greater image fidelity.

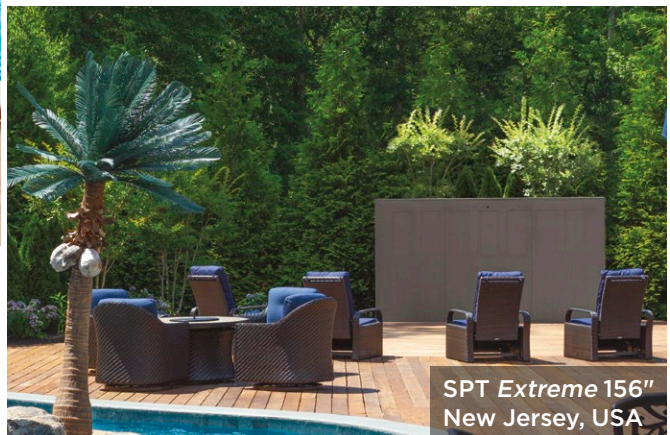

- The *Extreme* and *Transformer* models utilize P3 screens.
- The *Megalith* can now be specified in either the original P4 or the higher P3 resolution!
- A P3 pixel pitch screen offers 78% more pixels than a P4 screen of the same dimensions.

P4 Pixel Pitch
A 24mm × 24mm sample of a P4 resolution screen contains 36 pixels.

P3 Pixel Pitch
A 24mm × 24mm sample of a P3 resolution screen contains 64 pixels.

EXTREME
RETRACTING OUTDOOR TV

A POP-UP TV EXPERIENCE LIKE NO OTHER!

The SPT *Extreme* is a unique, retractable outdoor LED TV system. Its four massive screen sizes are large enough to be seen from the patio, the pool, and the entire backyard! When not in use the SPT *Extreme* disappears from view, retracting into its base. To further hide the *Extreme* its base cabinet can be partially or fully recessed into the landscaping.

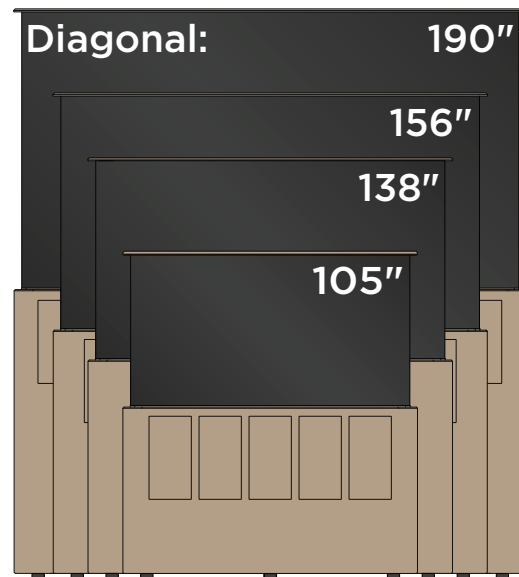

For audio as big as the screen, choose from cabinet-mounted speakers, which can operate while the display remains closed, or a Sound Bar that rises with the screen. Both options feature Stealth's speaker technology to produce high-quality sound without grilles that can rust. SPT *Extreme* is also available without speakers.

SPT Extreme 190"
Florida, USA

SPT Extreme At A Glance:

Screen Closure:	Vertically Retracts Into Cabinet
Screen Sizes:	P3: 105" / 138" / 156" / 190"
Screen Brightness:	4,000cd/m ² (nits)
Install Options:	<input type="checkbox"/> Above Ground <input type="checkbox"/> Partial Recess <input type="checkbox"/> Full Recess
Audio Options:	<input type="checkbox"/> No Sound <input type="checkbox"/> 3.1 Cabinet Mounted <input type="checkbox"/> 3.0/3.1 Sound Bar
A/V Input:	Outboard equipment rack included with most models
Control:	Compatible with all major third-party home automation systems
Power:	220-240VAC 20Amp Circuits: 2 to 6 (depending on model)
Sensors:	Ambient Light Sensor (optional) Rain Sensor (optional) Wind Sensor (optional)

Illinois, USA

SPT SYSTEMS ADD *WOW!* AND VALUE

- **Private residential** pool and patio installations provide a big "WOW!" factor in any setting.
- **Commercial installations** on amenity decks add a unique selling proposition to any multi-unit luxury living experience.
- **Sports pubs and restaurants** can take game day to a new level with a jumbotron-style TV on the patio.

FIT & FINISH

Each SPT *Extreme* cabinet is crafted in Stealth's facility using laser-cut aluminum and stainless steel framing materials, then finished with a durable hammered gloss paint that is easy to clean and maintain. Eight different colors are available. Custom finishes may be applied on-site for a completely integrated look.

TRANSFORMER
FOLDING OUTDOOR TV

A REVOLUTIONARY OUTDOOR THEATER SYSTEM!

The SPT *Transformer* is a complete outdoor theater system designed to fold away into its weatherized enclosure when not in use and fit discreetly on a yacht or home deck. When in use, the ultra-bright P3 LED screen can be easily viewed night or day and from virtually any angle.

By incorporating Stealth Acoustics' award-winning StingRay speakers and a subwoofer system directly into the weather-resistant fiberglass shell, the Transformer offers an incredible 3.1 audio experience right out of the box. The LCR speakers are sealed from the elements with no grilles to corrode.

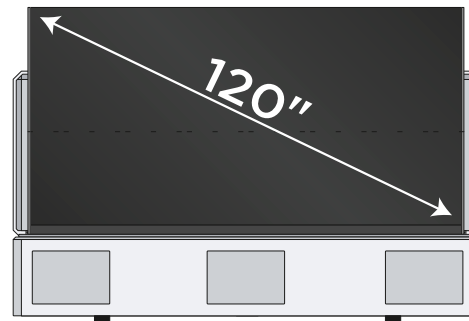

All necessary audio/video processing equipment can be contained within the enclosure or remotely located in an outboard A/V rack.

SUMMER

FIT & FINISH

When closed, the SPT *Transformer's* fiberglass cabinet seals for protection from the elements. To **Blend In!** or **Stand Out!** from the architectural and landscape surroundings, the *Transformer* is available in 12 yacht-grade, high-gloss finish colors. Contact your Stealth representative for additional, optional color choices and to request color swatch samples.

SPT *Megalith* 137"
Florida, USA

MASSIVE TVs THAT OUTSHINE ALL EXPECTATIONS!

The SPT *Megalith* is a fixed-position outdoor video display solution designed to provide entertainment 365 days a year, rain or shine. This completely customizable, weatherproof LED display can be installed as a free-standing display, mounted to an exterior wall, or even hung directly from a ceiling structure.

Megalith TVs are a complete system designed to the specifications of each project. For free-standing installations, an optional support structure package is available.

The optional integrated 3.1 Sound Bar adds high-quality audio for an impressive outdoor TV experience. The Sound Bar utilizes Stealth's Stingray outdoor speaker technology for weatherproof, rust-proof, high-fidelity audio.

Megalith TVs are ideal for large patio and pool areas, common areas, and public gathering spaces. ***Megalith* is the ultimate outdoor TV!**

SPT Megalith at a Glance:

Screen Closure:	Fixed Screen
Screen Sizes:	P3 or P4: 101" / 115" / 137" / 181" / 238" / 273" / 339"
Screen Brightness:	4,000cd/m ² (nits)
Install Options:	<input type="checkbox"/> Wall Mount <input type="checkbox"/> Free Standing
Audio Options:	<input type="checkbox"/> No Sound <input type="checkbox"/> 3.1 Sound Bar
A/V Input:	Outboard equipment rack included with most models (<i>configuration may vary</i>)
Control:	Compatible with all major third-party home automation systems
Power:	220-240VAC 20Amp Circuits: 2 to 6+ (depending on model)
Sensors:	Ambient Light Sensor (optional)

AVAILABLE IN HIGH RESOLUTION

Megalith is available in the standard P4 resolution and in P3 resolution to accommodate projects where a closer viewing distance is desired (see page 3).

SPT Megalith 181"
Arizona, USA

SOUND BAR

SPT *Megalith* and most *Extreme* models are available with an optional Sound Bar, which leverages Stealth Acoustics' award-winning outdoor speaker technology. The Sound Bar integrates cleanly into the SPT structure. Appropriate amplification is part of the Sound Bar package.

EQUIPMENT RACK

SPT systems typically include an outboard equipment rack that houses all A/V electronics necessary for operation. Depending on the project, the *Transformer* may instead contain all A/V electronics within its weatherized enclosure.

PROTECTING YOUR INVESTMENT

In case weather conditions change while in use, the SPT *Transformer* and *Extreme* are available with optional rain and wind sensors to automatically retract the screen for protection if rain or excessive wind is detected. An optional masthead creates a stable surface to remotely mount the sensors in an appropriate location.

REMOTE POWER SUPPLY KIT

A Remote Power Supply Kit high voltage relocation unit may be necessary for SPT installations near a pool or water feature. NEC code requires a 12' (3.6m) distance, but local building codes may vary.

LED TECHNOLOGY

Stealth Patio Theater systems feature long-life (100,000 hours), ultra-bright (4,000cd/m² (nits)) outdoor LED tiles, which outlast and outshine typical projection systems that underperform in daylight conditions. If an LED tile becomes damaged or malfunctions, its modular design allows for quick and easy hot-swappable service. Every SPT system includes spare LED tiles, and any replaced tiles should be returned to Stealth for repair and be restocked as spares.

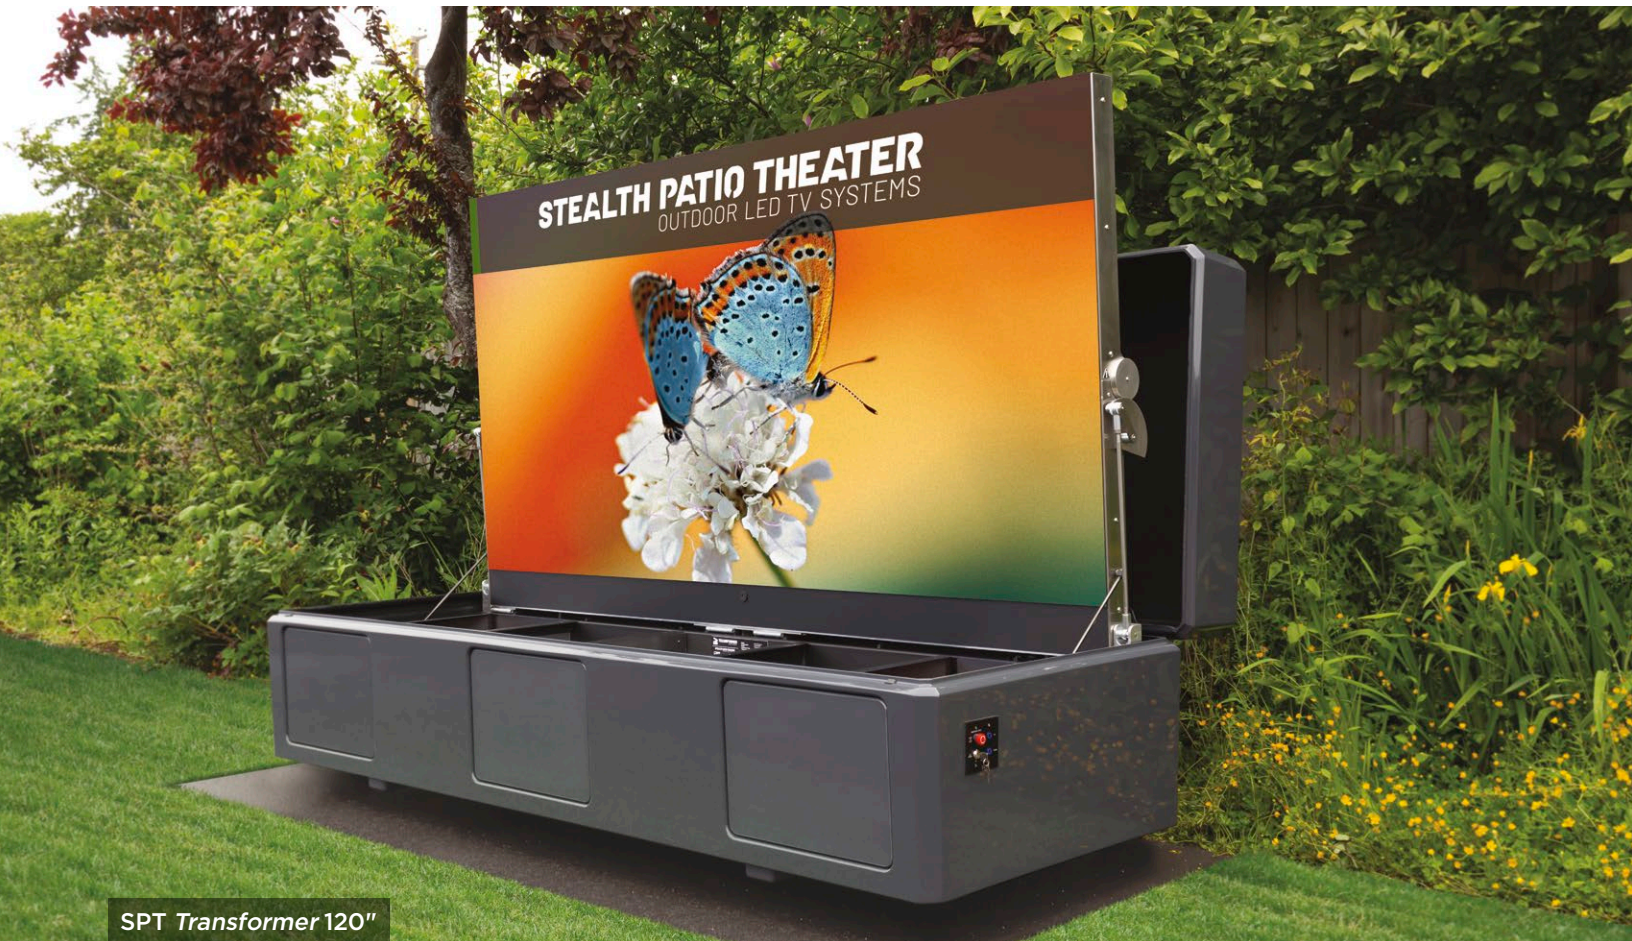

WARRANTY

The Standard Warranty Period is as follows (see *warranty documentation for full details*):

- **Five Years** for all Speaker Systems.
- **Two Years** for all LED Modules, LED Panels, Amplifiers and AV Processors.
- **One Year** for all other display components and parts, including; LED Power Supplies, LED Controllers, LED Screen Enclosure and Sub-enclosures, LED Screen Lifting Mechanisms, System Sensors, and System Controllers.
- **Lifetime** repairs for LED Tiles (*if repairable*)
